

Editorial Policy

Concept of Sustainability Information Disclosure

The MS&AD Insurance Group issues an annual Sustainability Report so that stakeholders can better understand the sustainability-related activities at the Group. In addition to including information that is considered important by stakeholders and the Group, the report is published via a website in order to save natural resources.

- The Group is making efforts to Create Shared Value (CSV) by utilizing the SDGs as leading marks, in order to realize a “resilient and sustainable society,” our ideal for society in 2030 as set forth in our Medium-Term Management Plan, Vision 2021.
- The report focuses on initiatives related to our priority issues of “contributing to climate change mitigation and adaptation” “striving to improve sustainability of natural capital,” and “implementing activities and dialog that respect human rights,” in addition to other initiatives related to our value creation approach.
- The report also mentions unique initiatives being carried out at Group companies (please refer below for the scope of the report).
- The report includes a collection of sustainability-related data.
