Diversity and Inclusion

Women in directors position

In May 2019, the Group CEO joined 30% Club Japan, which is the Japanese chapter of a global campaign aimed at producing female officers. For MS&AD, the percentage of female members of the Board of Directors including Audit & Supervisory Board Members is 25% as of October 2019, and a goal of 30% or more by FY2025 was set. MS&AD is engaged in the development of the system to continuously cultivate female director candidates by establishing a Groupwide network of female general managers, holding seminars by internal and external instructors, and assigning Directors as mentors within the Group and appointing women as part-time directors of affiliated companies.

Changing mind set of management team

Diversity & Inclusion training for the company’s executives of the Group was carried out in April 2019 to provide a deeper understanding of unconscious bias. Furthermore, as an initiative to change mind-set of those in management-level positions, management training and e-Learning on understanding unconscious bias and methods to proactively recognize and control one’s own bias are also being carried out.

What is “unconscious bias”?

Examples include thinking “men take the lead and women support them,” ”I would feel bad putting a woman in charge of duties with great responsibility,” and “women with small children cannot go on business trips” and refer to making assumptions based on factors such as age and gender.
