experience

### Agents

Sophistication of  
agent  
management

### Our company

Role upgrading for  
sales employees

The most appropriate proposals  
for each and every customer  
Implementing customer-oriented  
business operations

Increasing operational efficiency of  
sales employees  
Changing and upgrading roles

The screenshot displays the MS1 Brain interface, which is a dashboard for insurance agents. The interface is divided into several sections:

- Header:** MS&AD logo, 三井住友海上 (Mitsui Sumitomo Marine Insurance), 代理店 MS1 (Branch MS1), and a search bar.
- Navigation Bar:** Buttons for 契約・お客さま (Contract/Customers), 満期 (Maturity), 契約手続 (Contract Procedure), and 事故・保 (Accident/Insurance).
- Main Content Area:** A grid of buttons for 損保 (Insurance), 契約照会 (Contract Inquiry), 自賠償) 新規 (Self-Compensation) New, 長期契約管理 (Long-term Contract Management), 活動計画 (Activity Plan), ISS, and ダッシュ (Dashboard).
- Analytics Section:** A bar chart showing sales data (820, 1180, 890, 300, 200) and two donut charts for 当月 (This Month) and 翌月 (Next Month).
- CRM Section:** A table with columns for 重要度 (Importance) and 件名 (Subject). It lists several insurance-related events, such as "火災保険料 6~8% 上げ..." (Fire insurance premium increase) and "令和2年7月九州南部大雨" (Heavy rain in southern Kyushu in July 2020).
- MS1 Brain Sidebar:** A vertical menu on the right side of the interface, containing the following items:
  - 07/08 (水) 日本人女性初のスペースシャトル乗船の日 (Wednesday, July 8: The day when a Japanese woman became the first to ride the Space Shuttle)
  - 分析おすすめ (Recommended Analysis)
  - 保険関連ニュース (Insurance Related News)
  - お客さま検索・登録 (Customer Search/Registration)
  - 設定 (Settings)
  - 経営者メニュー (Manager Menu)
  - Brain Video (新種) を開く (Open Brain Video (New Type))
  - Brain Video (ライト) を開く (Open Brain Video (Light))
  - 事故対応について調べる (Learn about accident response)
  - 事故対応について調べる (Learn about accident response)

Two callout boxes highlight specific functions:

- SFA functions:** A blue box pointing to the "分析おすすめ" (Recommended Analysis) and "保険関連ニュース" (Insurance Related News) items in the sidebar.
- CRM function:** A pink box pointing to the "お客さま検索・登録" (Customer Search/Registration) item in the sidebar.

function area)

# RisTech

"Risk" x "Technology" = RiTech

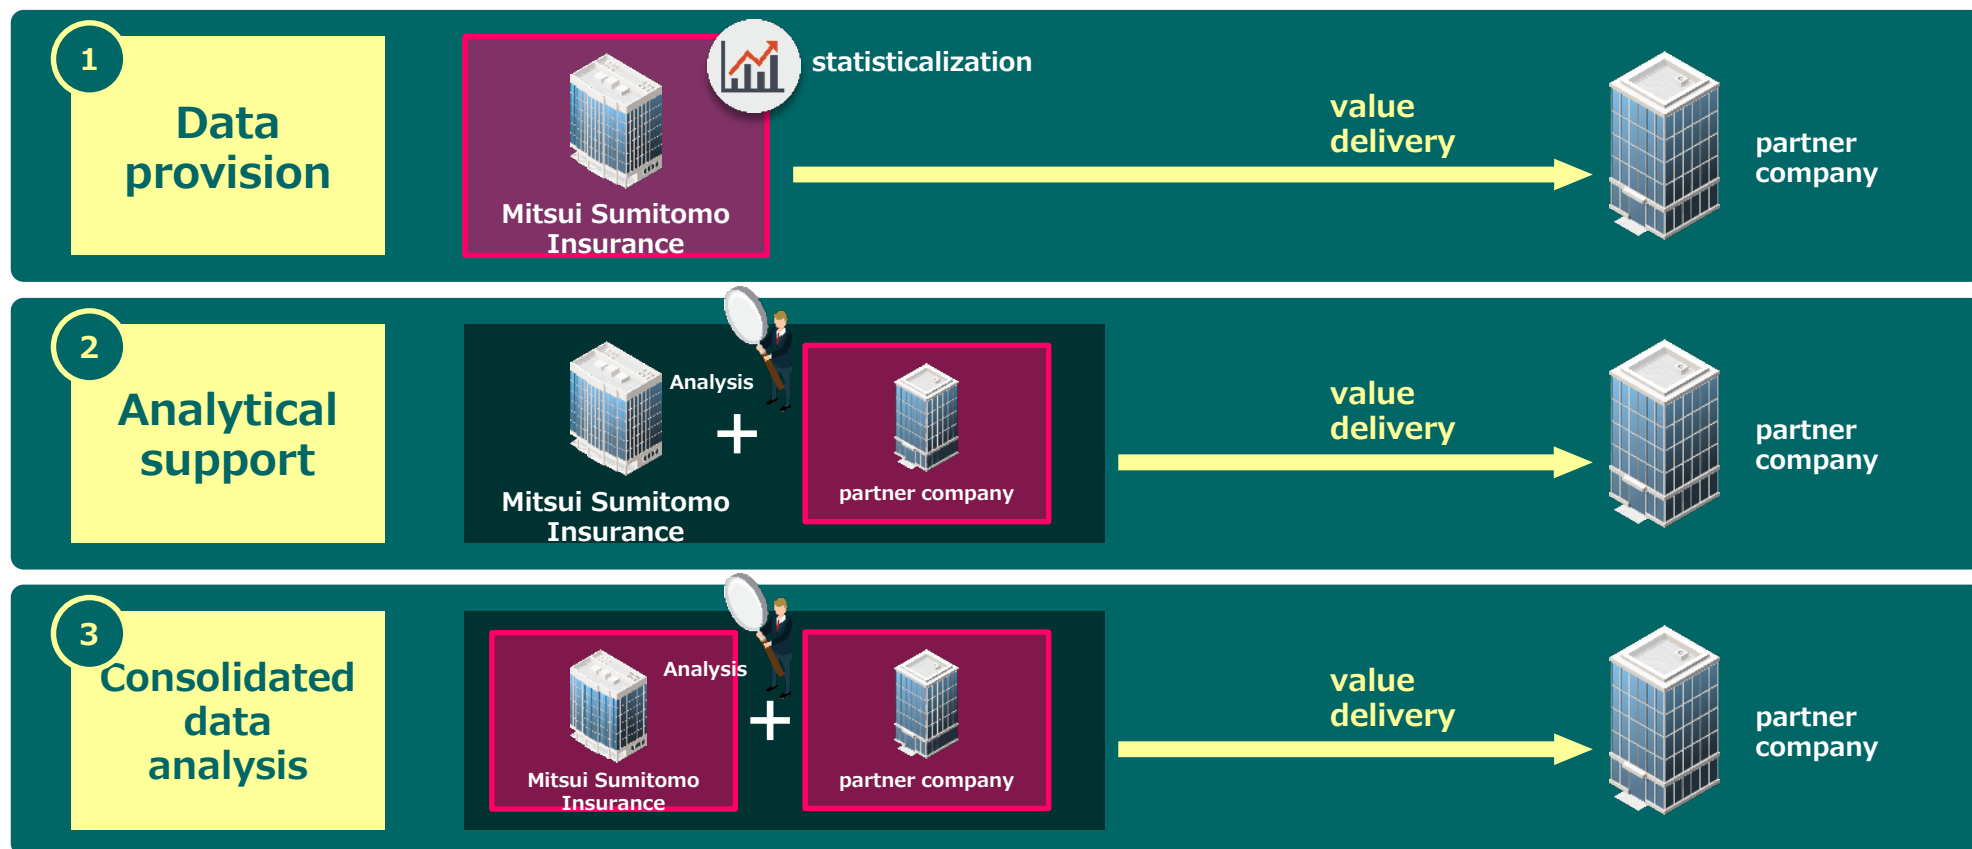

- There are three key value delivery schemes in RisTech
- Responding to the situation of partners

## Pattern of value delivery

 Subject of retention of usage data

**With RisTech, you'll be able to reach industry-wide and social issues.  
We will also work on themes and fields.**

**1**

## **Smart Mobility Initiatives**

Realization of a safer mobility society

**2**

## **Maintenance of social infrastructure**

Realization of a sustainable society

# RisTech-Smart Mobility Initiative

## Challenges of society and the transportation industry

Many accidents caused by elderly drivers

Securing drivers despite fluctuations in the demand for logistics

## Technological progress

Connected acquisition of operation data

  
**Mitsui Sumitomo Insurance insurance data**

  
**Auto vehicle operational dynamic data**

- Location of the car accident
- Total damage from car accidents

- Mileage and speed data
- Driver information

  
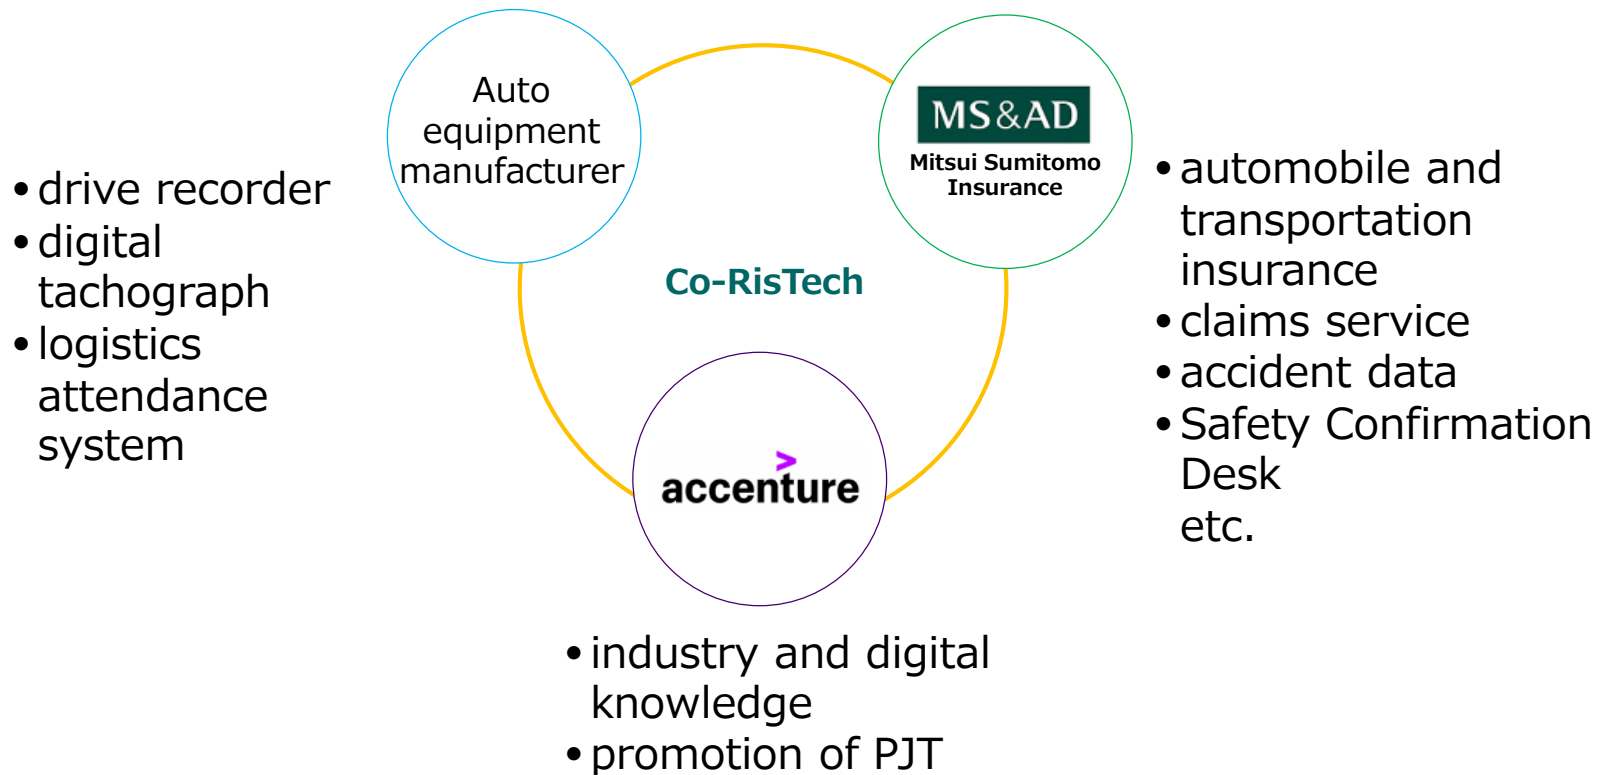

**Big data analysis**

- Safe driving scoring
- Accident prevention alert

**Realization of a zero-accident society**

## Contribution to the transportation industry and realization of a zero-accident society

# RisTech - Collaboration with auto equipment manufacturers

Service Output Validated by PoC

- Raise motivation by presenting improvement points and ranking of own score, while improving the accuracy of safety assessment

Visualization of scores by AI and company-wide ranking

For drivers: Feedback on level of awareness while driving

For administrators: Feedback on detailed decision reasons

# RisTech - Social Infrastructure Maintenance Support

Local governments across Japan are engaged in the maintenance of social infrastructure such as tunnels, bridges, and paved roads, but there are problems such as the cost of inspection and the shortage of inspectors.

**Road inspection has a wide scope of work, so there is not enough manpower ...**

Oversights and errors occurred during visual inspections.

The roads under the jurisdiction are wide and take a long time to check.

Compiling the results into a report is also difficult.

Limited manpower and budget make it impossible to inspect all roads.

**... Resolved by introduction of AI service for road inspection**

AI automatically detects and reports damage

## Service Delivery

Automatic detection of holes, cracks, ruts, etc. that require repair by AI analysis of images taken with a dedicated drive recorder. Mapping using GPS data. Provides a website where you can manage renovation policies and status.

### Road inspection

Analyzing images with  
AI and displaying them  
on Web screens

### Bridge inspection

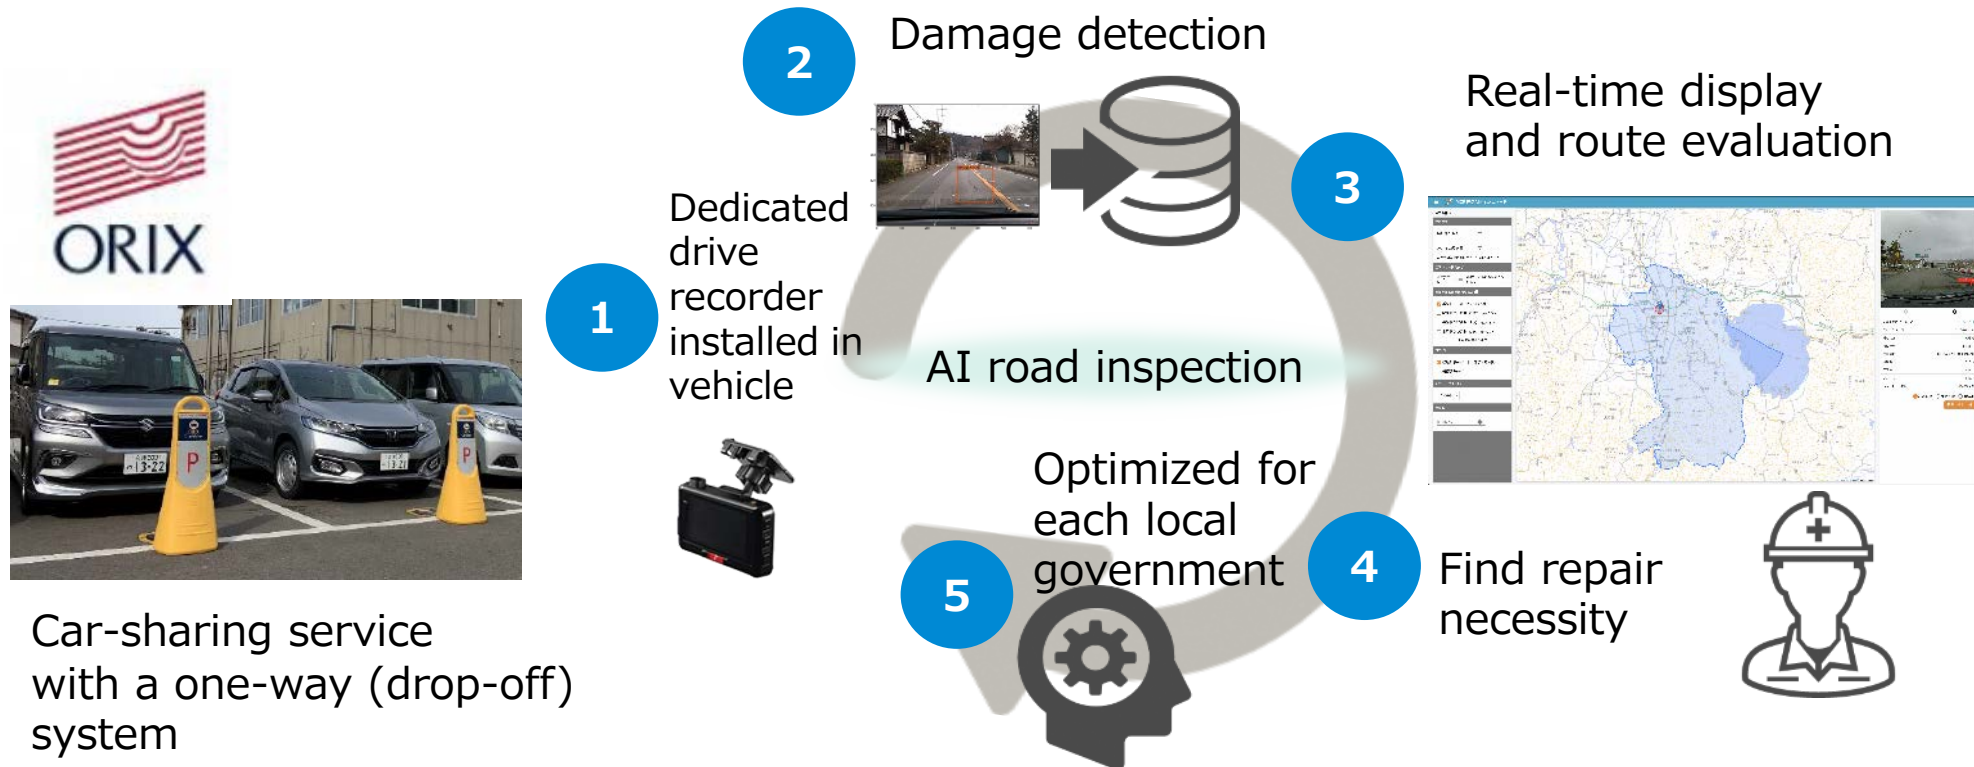

More than 30% of bridges were built 50 years ago, and by 2029 more than half of them will be over 50 years old. This is an important social issue as well as roads.

- System development and other preparations will be made in fiscal 2021, and sales are scheduled to begin in the second half.
- The assumption is that from the 2nd year onward we will shift to a sales expansion system utilizing the full scale of our company sales network.
- We will start with a road inspection project using a dedicated drive recorder, but we will continue development using drones, etc. to seek a market-leading position.

# RisTech - Social Infrastructure Maintenance Support

ORIX Auto Corporation (President: Yuji Kamiyauchi) installed a dedicated drive recorder in the vehicles of the next-generation mobility service "One-way (drop-off) car sharing service" to conduct demonstration tests in Aizuwakamatsu City. They collect image data of the roads on which vehicles are traveling, verify the technology to detect the damaged parts of roads through image analysis using AI, and optimize the detection function according to the characteristics of Aizuwakamatsu City, which has a large amount of snowfall.

Car-sharing service with a one-way (drop-off) system

Advancing with you
