

MS&AD Ventures

- Building long term value -

Jon Soberg & Tak Sato
MS&AD Ventures Inc.
September, 2019

Self Introduction

Mr. Jon Soberg

Mr. Tak Sato

Data from device to Cloud

Data from Cloud to device

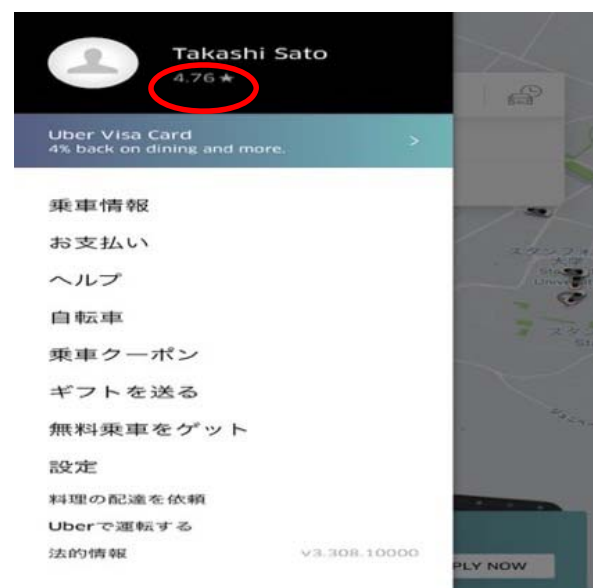

Essence of IoT:

- The value of things can increase overnight because of the data. (physical goods usually depreciate in value over time)
- **Data transmission**, instantaneous change and long term value rather than data reception and collection

Driver Scoring

User Scoring

Essence of Sharing Economy :
Mutual Evaluation System = Simple Data Collection
 ⇒ High Value of Scoring System

Free pitch events are held in the neighborhood every day.
→ People start new businesses every day by solving problems and issues (Pain Points) with new technologies and business models. Many people work on new business ideas at home after work.

4

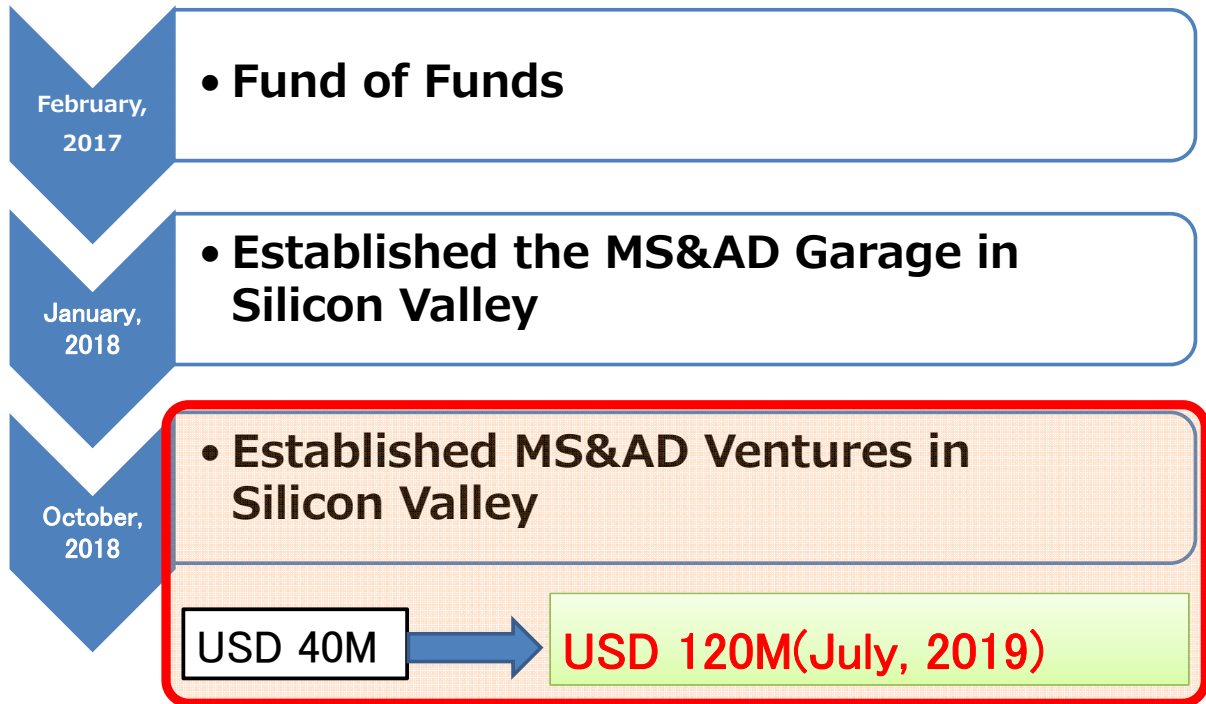

Coffee Shops are always spirited and busy.
→The Ecosystem has constant exchanging of ideas back and forth between Startups and Venture Capitalists

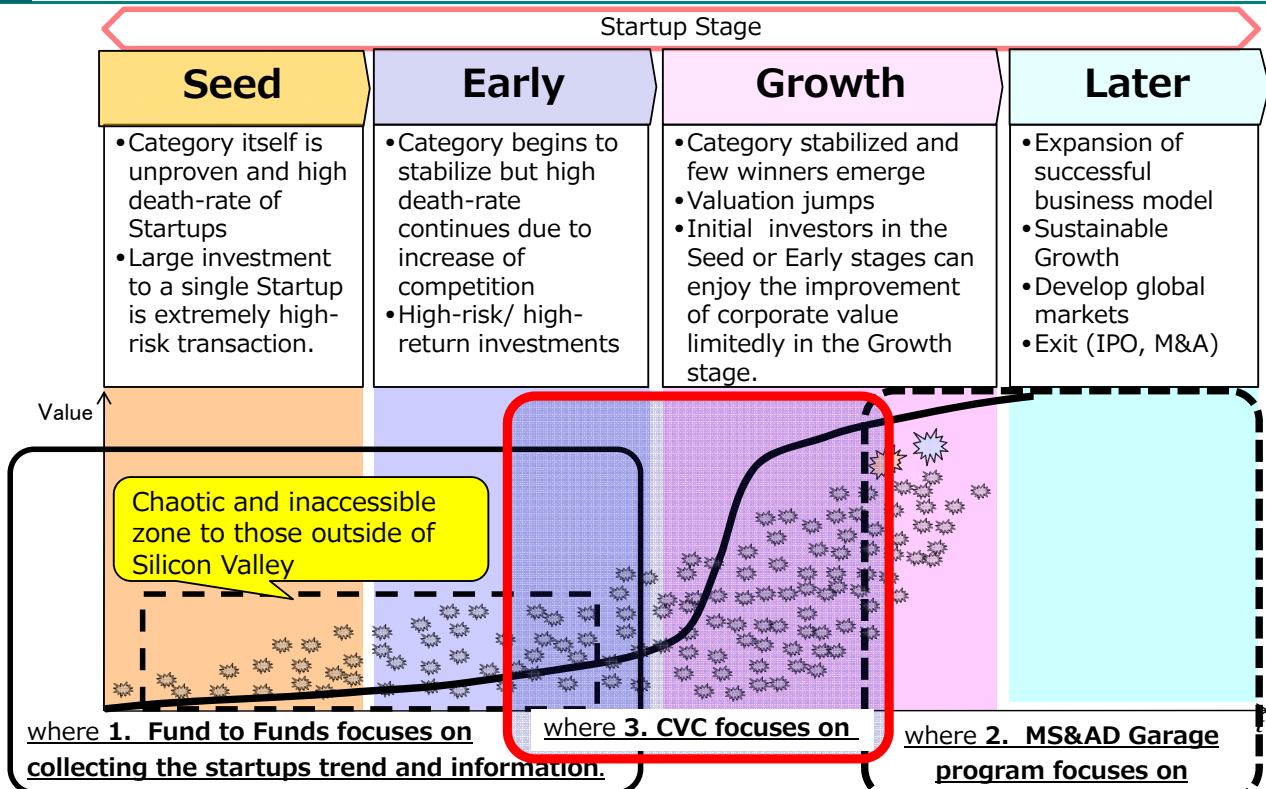

Silicon Valley is a special world where **limited** Venture Capitalists have access to **the world's** know-how on success and failure, human networks, and cutting-edge trends, all of which come together in relationships and financing.

→The world's largest **Laboratory** for innovation

5

The strategy for Silicon Valley by MS&AD

Why do we need to invest? Why CVC?

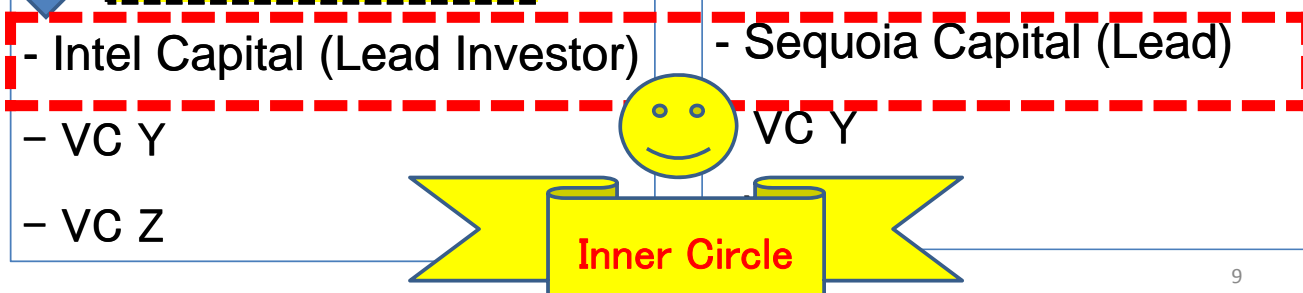

Major startups don't need funding from large companies.
(Funds are easily collected from any venture capital fund)

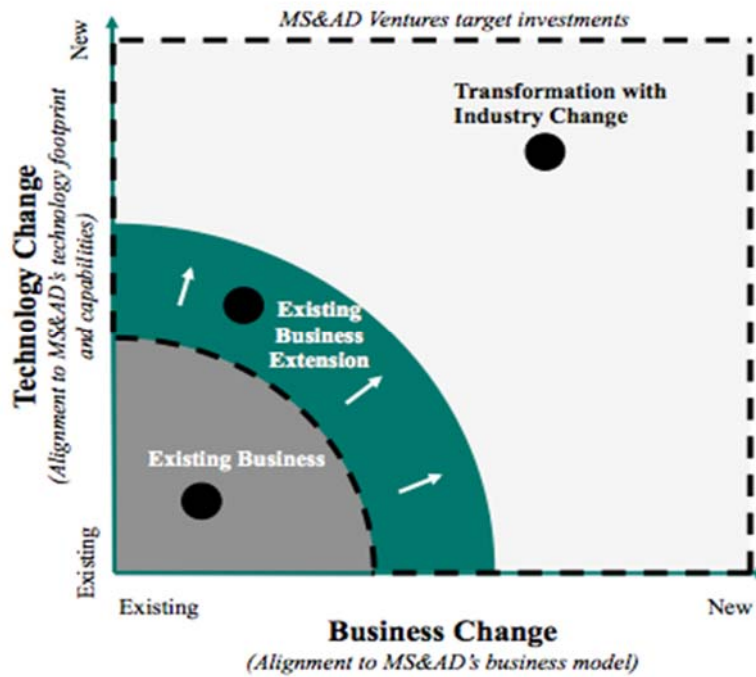

- ✓ Gaining access to the strong startups:
Without any strong investor in the community, even the first appointment cannot be made with any major Startup.
- ✓ To have "Skin in the game"(shows the commitment of the common destiny)
- ✓ Ability to move quickly when there are good opportunities:
Time consuming for decision making for large companies to invest by their head office.

What is the Inner Circle??

Activities in Silicon Valley before investment stage.

Pain Points (issues to be solved) should be clarified / approach Startups

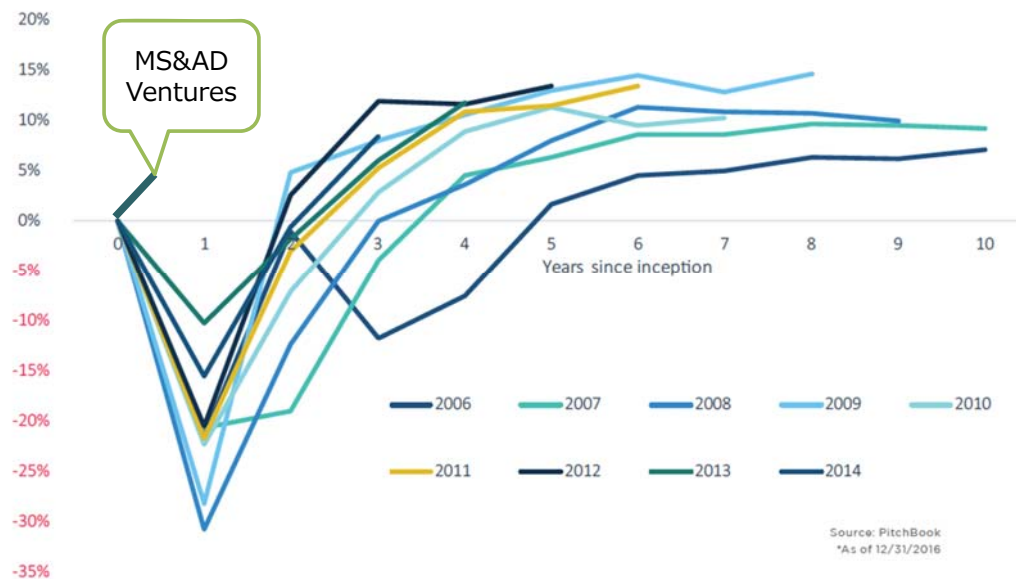

10

Our financial performance is ahead of most funds at this early point

The chart shows a study of J-curve IRR for private equity funds over 10 years by Pitchbook

PE J-curve: IRRs over time by vintage

11

Our portfolio looks like a next generation insurance company

13

Founded	2017	Total Funding	\$43.25M
Location	Silicon Valley	Co-Investors	-QBE -Data Collective -Ignition Partners
Founders	Rich Sorkin (CEO), Josh Hacker, Eric Wun		

Thesis	<ul style="list-style-type: none"> • Most advanced and accurate climate risk modeling solution • The services that have been released are "Flood disaster prediction model" and "Abnormal temperature disaster prediction model"
Team and Strength	Nobel Prize winners in weather research and 70 world-renowned Ocean weather analysis model used in the country ("Princeton Ocean Model ") is enrolled.
Customers / Partners	NASA, New York City, Miami, many companies
Notable Facts	Uses more data than any competitors to get accuracy to 1 square meter

14

Founded	2011	Total Funding	\$145M
Location	- Boston and North Carolina - Lisbon - London	Co-Investors	- Menlo Ventures (USA) - SingTel Innov8 (Singapore) - Comcast Ventures (USA)
Founders	Tom Turner CEO, Stefan Boyer CTO		

Thesis	<ul style="list-style-type: none"> • Pioneer company of scoring the defense level for cyber security. • Cyber risk scoring possible without a questionnaire
Strength	<ul style="list-style-type: none"> • More than 80 billion security events (virus infections, etc.) are monitored in a day. • Discover deviation from the industry average score and the event of decline in score.
Customers / Partners	<ul style="list-style-type: none"> • More than 170,000 companies have been rated. 125 of Fortune 500 companies are customers. • 7 of the world's top 10 cyber insurance companies use the company's Security Rating. • Selected as 25 Unicorn candidates for Forbes magazine. • Main customers are all 4 major audit firms, 4 of the 5 major investment banks

15

Identify and conduct scoring for cyber accidents without customer self-report including the date and time

➤ Overall evaluation is displayed with a maximum of 900 points

- ① Rating
- ② Evaluation category
- ③ Past ratings
- ④ Average value in the same industry

➤ Rating is an absolute rating of 900 points, high score = high cyber defense power

- ① Grade
- ② Overall position
- ③ Number of target companies

Security Ratings

Bitsight Security Rating
 Our ratings measure a company's relative security effectiveness.

480

① 480 (Rating)
 ② Advanced (900-740)
 ③ Intermediate (740-640)
 ④ Basic (640-250)

④ Business Services Industry Range

➤ Rating is an absolute rating of 900 points, high score = high cyber defense power

- ① Grade
- ② Overall position
- ③ Number of target companies

Botnet Infections

① D Grade
 ② In the bottom 30% of all companies

③ 0 This Week, 2,864 Past Year

1.5 days Average Duration

1 This Week, 2 Past Year

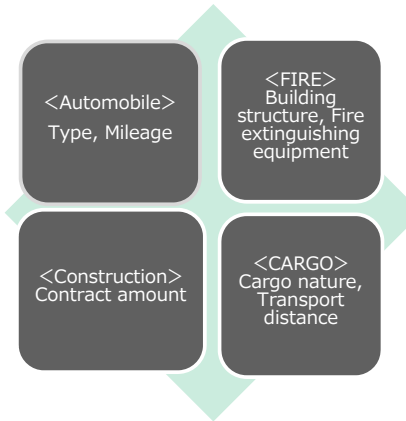

4.3 days Average Duration

BUSINESS SERVICES INDUSTRY AVERAGES

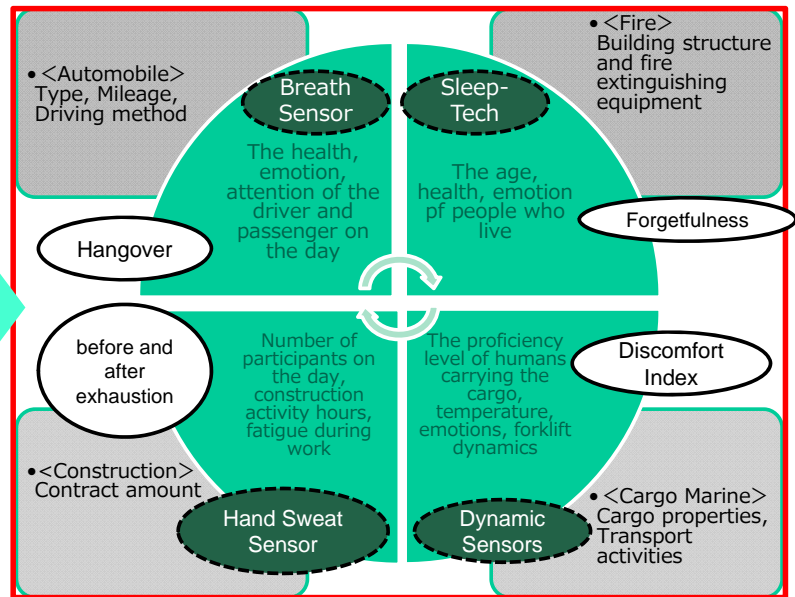

Disruptive Movement: SME Marketing (Distribution)

Touch Point	Traditional sales channels	Worrisome movements in Europe and the United States	Relationship with insurance events
Entrepreneurship and Business Start	Introductions from banks and acquaintances	<ul style="list-style-type: none"> • Company domain registration • Company and Challenger Bank 	<ul style="list-style-type: none"> • (Face-to-face or not Pc from the beginning) The best fire, liability insurance for the UI. • No basic company information is required to enter (the company information on the left is linked).
Business expansion period	Introduction from logistics companies and trading companies	<ul style="list-style-type: none"> • Cloud Company • EcRegister to open a store 	<ul style="list-style-type: none"> • Subdivision-linked cyber insurance according to the contents of the cloud contract
Gig Economy	Payroll Company (payroll agency)	Hourly units Digital Payroll And Tax Filing Company	<ul style="list-style-type: none"> • Workers' compensation insurance according to the contents of hourly work

Present: Insurance is mono-centric (1Times of **Static** Data)

Future: To the **human center** ("data that was not able to be taken before" can now be collected easily)

Disruptive example combines data from multiple Startups

<Inimitable business model using data base>

To the labor accident insurance and the loss prevention proposal according to the weather conditions (high temperature/rain), worker's fatigue condition, and the working time zone (midday/midnight).

"A risk-tech company that combines data and analysis from multiple Startups, rather than a single service, to provide a completely new service using data at its core."

Thank you
